

SKU: MBKEC00280M

In-line ventilation box. Built with a backward-bladed centrifugal fan mounted on an external rotor motor. The motors used in this series are brushless, high-efficiency EC motors. Suitable for control via a 0-10V input signal.

- · Single ear reaction fan
- · External rotor motor.
- · Enclosure made of galvanised sheet steel.
- External rotor motor with IP44 protection, B class.
  - · Adjustable.
- $\cdot$  Sandwich panel with 20mm thick thermo-acoustic insulation.
- · High efficiency brushless EC motors. They can be controlled by a 0-10V signal.
